

## INDEECO Rolls Out New Electric Wall Heaters

A new series of electric Wall Heaters for architectural, commercial and industrial applications has been introduced by INDEECO, a leading manufacturer of electric heating equipment and controls.

INDEECO Wall Heater units are designed to heat areas affected by cold drafts or wide temperature swings such as garages, vestibules, stairwells, etc. Unit sizes range from 2 kW to 4.8 kW.

WAI Series wall heaters for architectural and commercial applications feature a stylish aluminum grille with a dark brown epoxy/polyester powder coat finish. WCI Series wall heaters for commercial and industrial applications are designed with rounded corners for safety and feature a louvered, 18-gauge steel front grille. WCI units are available with a white or almond epoxy/polyester powder coat finish for durability.

Standard controls for WAI and WCI Series heaters include a built-in automatic reset thermal cutout for overtemperature protection, a built-in thermostat and a fan override. Adaptors are available for surface mounting of the units.

Both the WAI and WCI Series units are CSA-approved to US (UL) standards.
