

iHeatTube STB

Pre-Insulated Tube

Indeeco can provide long coil lengths, easily installed, fully weatherproof, and free of tube unions. Factory insulated, coiled tube, supplied on wooden spools. Superior to field insulated tube for cost of installation, longevity, and performance.

Product Attributes

- Industry best practice for reliability
- Low cost installation
- Labor saving
- Heat retention/energy saving
- Safe for direct personnel contact
- Long continuous coil lengths to reduce fittings and leaks
- Robust and long lasting
- Easy and reliable installation
- Maintenance free
- Corrosion prevention
- Cut to length in the field

Model Number

- IHT1N-38AS-N-P (example shows 3/8 x 0.035" 316 seamless insulated tube)

Construction

- Fiberglass insulation encasing the tube
- Weather sealing extruded outer jacket
- Provides personnel protection from elevated tube temperatures
- 500°F maximum tube exposure temperature

Installation Accessories

- Heat shrink end seal and entry seal kits to moisture seal the ends
- Reusable stainless steel straps with halogen free coating provides secure installation routing
